What are fillers?:

Dermal fillers were first used in the 19th century with paraffin injections. In the 1980s, modern fillers emerged, pioneered by Dr. Michel Eugène Tétrault and later refined by Dr. Arnold William Klein. Dermal fillers are injectable substances used to restore volume and smooth wrinkles in the skin. Typically composed of hyaluronic acid or other biocompatible materials, they enhance facial contours, reduce fine lines, and provide a more youthful appearance. The procedure is non-surgical and results are temporary, lasting several months to a year. Common types of fillers include Hyaluronic Acid Fillers (e.g., Juvederm, Restylane).

Myth Busters:

Myth 1: Fillers are permanent.

Fact: Most fillers are temporary, providing temporary enhancements and results.

Myth 2: Fillers are only for wrinkles.

Fact: Fillers can also add volume, sculpt contours, and enhance features.

Myth 3: Dermal fillers make you look unnatural.

Fact: Skillful application ensures natural-looking results with dermal filler treatments.

Myth 4: All fillers are the same.

Fact: Different fillers have unique properties, suited for specific needs.

Before and After:

FAQS:

- **Q: Do lip fillers hurt?**
- **A:** Minimal discomfort; topical anesthesia ensures a comfortable experience.
- **Q: How long do lip fillers last?**
- **A:** Results typically last 6-12 months; varies by individual metabolism.
- **Q: Are lip fillers reversible?**
- **A:** Yes, with enzyme injections like hyaluronidase; reversibility offers flexibility.
- **Q: Can I choose lip filler volume?**
- **A:** Yes, customizable; discuss desired volume with the injector beforehand.
- **Q: Can I get natural-looking results?**
- **A:** Yes, skilled injectors can achieve natural enhancements for a subtle effect.
- **Q: Will my lips feel different?**
- **A:** Initially, slight tightness or fullness; normal sensation returns within days.
- **Q: Are lip fillers safe?**
- **A:** Generally safe; complications are rare with a skilled and experienced injector.
- **Q: What is the recovery time?**
- **A:** Minimal downtime; slight swelling and bruising may occur for a few days.
